June 1946

PERIODICALS FOR 1947

Why the list is issued

Our order for 1947 periodicals must be placed by August 10. In order to know what magazines are most needed by Department personnel in our region and how many copies we must have to meet the demand, we are issuing this periodical list.

In the final analysis, the titles for which we subscribe and the number of copies we take must be determined by the amount of money we can spend for periodicals. Consequently, some of the titles on this list may later be eliminated. Announcement of such elimination will be made in January when the 1947 subscriptions begin.

To guide your selection

In making your selections, keep these points in mind:

Selection of titles should be limited to those most important and necessary for regular scanning in connection with official work.

Requests by an individual should be limited to the number which he can conveniently read within the 3 day limit.

The Bibliography of Agriculture may be used to help locate articles in specific fields of interest without taking time to scan many periodicals.

How to submit requests

Submit your requests on 5x5 inch slips with title of periodical at top of slip and your name, agency, and address below---one title to a slip.

If you are an old patron, review the list and ask to have discontinued any titles you no longer need. Send slips for any additional periodicals you may need, but please do not submit requests for periodicals you are already taking and wish to continue receiving.

Periodical loan rules

Any employee of the Department may receive periodicals regularly simply by asking to be placed on the mailing list. (Because of the length of routing lists some periodicals are a bit old before they make the rounds.)

A periodical may be kept three days and must then be sent to the next office on the routing slip.

The routing slip must be dated and initialed before mailing the periodical.

PLEASE SEND IN YOUR REQUESTS BY JULY 1st.

The Periodicals

- Acco press. m.
 Agricultural engineering. m.

SOME NEW BOOKS IN THE LIBRARY

ARITHMETIC IN AGRICULTURE, by T. H. Fenske and others. Webb, 1945. 243p.
325 F55

This book was written as a textbook and the first four chapters comprise a review of the fundamentals in arithmetic. The following chapters give a practical application of arithmetic to work on the farm, the chapter headings being: Use of measures on the farm; Weights and their use; Farm credit and the wise use of money; Crops, soils, and fertilizers; The dairy herd; General livestock and poultry; Farm building and engineering; Farm economics and management; Farm problems review.

EDUCATION FOR RURAL AMERICA, by F. W. Reeves. University of Chicago Press, 1945. 213p. 275 R25E

"How can education improve rural life and the life of the nation? What agencies contribute most to rural education? For what type of living should rural youth be prepared? What agencies and what techniques are most effective in the education of rural adults? Answers to these questions and many more emerge from this report of the Conference on Education in Rural Communities held at the University of Chicago in the summer of 1944.

This book deals with the total picture of rural education in America, particularly in the light of our changing economic order, our scientific and technical development, and our growing responsibilities in the world." From the book jacket.

FARM TRACTOR MAINTENANCE, by I. G. Morrison. Interstate, 1946. 202p. 58 M83F

This very practical and well illustrated book is divided into six sections entitled: Introduction, Preventive maintenance procedures, Mechanical services in tractor maintenance, Maintenance through careful operation, Trouble-shooting, and Tractor storage.

FARMS AND FARMERS: THE STORY OF AMERICAN AGRICULTURE, by W. H. Clark. Page, 1945. 345p. 30.9 C542

One of the American Cavalcade Series, this book is the dramatic history of the American farmer. Here we find the colorful adventure of land-hungry immigrants who despite poverty, hardship, and peril transformed the American wilderness into homesteads, plantations, and ranches during the past three hundred years. This book should be helpful to Americans in familiarizing themselves with our agricultural past and the conditions which brought about the complicated problems that characterize farming today.

SUCCESS ON THE SMALL FARM, by H. S. Pearson. McGraw-Hill, 1946. 285p. 31.3 P312

Mr. Pearson offers what he considers a specific, practical program for making a cash profit of \$3000 a year from a one-man farm of ten or twelve acres. The book contains discussions of the points to keep in mind when buying a farm, of irrigation, soil improvement and fertilization, of tools and equipment, of the selection and care of poultry and livestock. Then the author discusses the choice of several specialty crops that will bring in a high cash income from May to November. His plan is that the farmer will have six months of leisurely living after six months of hustling work.

SUPERVISING PEOPLE, by G. D. Halsey. Harper, 1946. 233p. 249.3 H16S

"An experienced personnel executive, student, and writer here supplies a simple, straightforward, easily understood statement of all the phases of the supervision of people which can be improved by systematic study and application. The book is designed to be used either as a text for group study by supervisory people or for individual self-help. The suggestions made are specific and reinforced with interesting anecdotes." From book jacket.

USING THE LIBRARY

FORM AD-245. Use this form in requesting publications. See next page for instructions regarding its use. Requests for library publications may be sent under frank.

- LOAN PERIODS.
1. Usual--Two weeks; renewable upon request if not needed elsewhere.
 2. Limited--Dependant on circumstances. These may be books in great demand or books borrowed on inter-library loan whose date limit is set by the lending library. Watch the date.
 3. Maximum--One month; renewable, if not needed elsewhere, for one additional month only.
 4. Current periodicals--Three days per person.

WHO MAY USE THE LIBRARY. This library was established to serve all the Department of Agriculture personnel in this region. Outsiders use it occasionally.

RETURNING BOOKS. Please wrap books in card board or stiff paper to protect the bindings.

THE USE OF FORM AD-245

In order to save your time and ours we are encouraging the use of Form AD-245 in requesting publications from the library. This is a standard USDA form and may be secured from your regional supply center in the same manner in which you obtain other standard forms.

A correctly completed AD-245 for the first book listed in this issue of the Newsletter should look like this:

The call number	CALL NO. 325 F36	U.S. DEPARTMENT OF AGRICULTURE LIBRARY REQUEST AUTHOR (SURNAME FIRST) Fenske, T. H., and others	
Your name and address	FOR John Doe BUREAU PMA Jay, Okla.	TITLE Arithmetic in agriculture.	
		PERIODICAL	
		VOL. NO. PAGE	DATE
		CHARGED	RETURN TO

A correctly completed AD-245 for a magazine article should look like this:

The author, title of the article and of the periodical should all be given when available; also the volume, number, pages and date.	CALL NO. 49 T29	U.S. DEPARTMENT OF AGRICULTURE LIBRARY REQUEST AUTHOR (SURNAME FIRST) Miller, E. A.	
	FOR John Doe BUREAU PMA Jay, Okla.	TITLE Plant hybrid corn for greater yields.	
		PERIODICAL Tex. Livestock Jour. VOL. 2 NO. 11 PAGE 10 DATE Nov. 15 '43	
		CHARGED	RETURN TO

This reference was taken from the Bibliography of Agriculture and appeared as follows:

MILLER, E.A. Plant hybrid corn for
 greater yields. Tex. Livestock Jour. 2(11): 10.
 Nov. 15, 1943. 49 T29

The same form should be used when requesting references found in any other bibliography. Please give all the information you have, but do not hesitate to send in a request if you know only the title or the author and subject or do not know the call number. Please request information or references on subjects by memo or card.

We shall appreciate your cooperation in submitting all requests on properly executed forms. Thank you.
